

ALJAWHARAH ALSUBAIE

Information Technology

☎ +966501926876 ✉ aljawharaas1@gmail.com 💎 Riyadh, Saudi Arabia 🌐 Aljawharah Alsubaie

Summary

IT graduate with multiple peer-reviewed publications in AI-powered assistive systems. Built and deployed machine learning models achieving up to 98% accuracy across computer vision tasks, with hands-on experience in AI/ML, data mining, and full-stack mobile development. Seeking AI or software development roles that bridge research and real-world impact.

Education

King Saud University

2022 – 2026

Bachelor of Science in Information Technology | First Class Honors

GPA: 4.95

Achievements

- Winner of Outstanding Academic Projects Competition (5th Edition) for mehar project
- Contributed to IBM collaboration project, presenting to IBM specialists
- Participated in ICAN Conference in collaboration with IBM, showcasing Munir project (January 2026)
- Participated in Tamkeen Exhibition in collaboration with IBM, showcasing Munir project (January 2026)
- Developed IT 426 – AI Fundamentals course materials under faculty supervision (university-compensated role); received institutional funding from King Saud University

Publications

- Alsubaie, A. et al. “Munir: A Multimodal Smart-Glass System for Enhancing Human-Computer Interaction and Accessibility for Visually Impaired Individuals.” *Sensors*, MDPI. (Published, 2026).
- Alsubaie, A. et al. “A Hybrid Framework for Real-Time Saudi Riyal Banknote Recognition in Assistive Applications.” *Applied Sciences*, MDPI. (Published, 2026).

Projects

Munir | IBM Collaboration Project – Graduation Project

Aug 2025 – Jun 2026

- Developed an AI-powered assistive mobile application for visually impaired users in collaboration with IBM; delivered weekly presentations to IBM specialists and showcased the project at ICAN 2026 Conference.
- Built currency recognition (96.84% accuracy) and face recognition (98.16% accuracy) models using MobileNetV2, ArcFace, and SVM classifiers.
- Programmed OMI smart glasses (ESP32-S3) to capture images via voice commands and transmit data to the mobile app for real-time AI processing and audio response.
- Developed Flutter app with OCR, color detection, SOS alerts, bilingual TTS (Arabic/English), AES-256 encryption, and Firebase Cloud Functions.

mehar

Jan 2025 – Jun 2025

- Developed a full-stack booking platform for workshops and activities to support SMEs; winner of Outstanding Academic Projects Competition (5th Edition). Built with HTML, CSS, JavaScript, Node.js, PHP, and MySQL.

Skills

Programming Languages: Python, Java, Dart

Web Technologies: HTML, CSS, JavaScript, Node.js, PHP

Databases: SQL, NoSQL, MySQL, Firebase

AI/ML: Computer Vision, Transfer Learning, Feature Extraction, Data Mining, Model Training, IBM AutoAI

Mobile Development: Flutter, Firebase Authentication, Cloud Functions, BLE Integration

Security: AES-256 Encryption, Cybersecurity Principles

Tools & Frameworks: Git, Firebase, REST APIs, OpenSSL

Methodologies: Agile (Scrum), Project Management, UX/UI Design

Soft Skills: Problem Solving, Team Collaboration, Critical Thinking, Communication, Time Management, Attention to Detail, Adaptability

Languages

- Arabic (Native)
- English (Professional)

Certifications

- Artificial Intelligence Fundamentals with Capstone Project (IBM SkillsBuild, 2025)
- IBM AI Developers Program (IBM, Jul–Nov 2025)
- Projects in Machine Learning: Beginner to Professional (Udemy, Nov 2025)
